AIEE INDEXES

This pamphlet contains complete multientry indexes covering the entire text content of AIEE regular technical publications, as follows:

1. Electrical Engineering, monthly, sent to all members. Contains two parts:

I. General articles, news, and biographical items.
II. Transactions section, containing technical-program papers.

2. Supplement to Electrical Engineering—Transactions Section. Issued in limited quantities at mid-year (June Supplement) and year-end (December Supplement). Contains the technical program papers that could not be accommodated in the monthly Transactions sections of *Electrical Engineering*, plus discussions of all technical-program papers published during the preceding half year. Price 50 cents per copy.

3. AIEE Transactions. Published annually. Contains all approved technical-program papers and related discussions for the calendar year. Consists of Transactions sections from the monthly issues of *Electrical Engineering;* the two semiannual Supplements (as described in item 2 above); and certain other material considered to be of permanent record value. Price $4.00 per copy to AIEE members; $12.00 plus foreign postage to nonmembers.

I. GENERAL MATERIAL
(Pages 3–12)

General articles, news, and biographical items published in the general monthly periodical are indexed as follows:

1. Subject Index. Lists all general-interest articles by subjects.

2. Author Index. Lists authors of all general-interest articles and "Letters to the Editor."

3. AIEE News Index. Lists all news items pertaining to Institute Activities.

4. Non-AIEE News Index. Lists all news items "Of Current Interest" not pertaining directly to Institute Activities.

5. Biographical Index. Lists all personal and obituary items on AIEE members.

Page Allocation by Issues

January	1–56	July	303–364
February	57–98	August-September	365–434
March	99–144	October	435–494
April	145–192	November	495–546
May	193–244	December	547–600
June	245–302		

II. TRANSACTIONS MATERIAL
(Pages 13–24)

Technical-program papers and related discussions are indexed as follows:

1. Technical-Subject Index. Lists all technical-program papers and related discussions by subjects.

2. Author Index. Lists authors of all technical program papers and discussions.

Of the total content of the 1946 annual *Transactions*, pages 1–482 and 521–860 inclusive were published in the Transactions sections of *Electrical Engineering* during 1946 as tabulated below; pages 483–520 were published in the June "Supplement to Electrical Engineering—Transactions Section" and pages 861–1196 in the December Supplement.

Page Allocation by Issues

January	1–40	July	403–482
February	41–96	August-September	521–622
March	97–176	October	623–698

1. Technical-Subject Index

A-C Ammeters and Voltmeters, Frequency Compensated. Whittenton, Wilkinson.....761–4

A-C Arc in an Air Blast, Dielectric Recovery by an. Browne.....169–76; disc. 507

A-C Electric-Power Systems in Large Military Aircraft, Basic Design Principles for. Chappuis, Olmsted.....12–17; disc. 487

A-C Generators, Application and Performance of Electronic Exciters for Large. Langstaff, Vaughan, Lawrence.....246–53; disc. 515

A-C Motors and Generators, Transients in. Smith. 61–9

A-C Network Analyzer, A New Design for the. Ryder, Boast.....674–80; disc. 1162

A-C Power Cable, Semiconducting Shielding for. Merrell.....605–09; disc. 1145

Accelerated Flux Reversal in Reactor Cores Operating Above Saturation Density, Peak Voltages Induced by. Specht, Wentz.....254–63

Accuracy of Selsyn Generator-Control Transformer System, Electrical. Chestnut.....570–6; disc. 1118

Aeronautical Research, 150,000 Horsepower Applied to. White.....833–9

Affecting the Range of Radar Sets, Factors. Quarles, Breazeale.....546–8

Air Blast, Dielectric Recovery by an A-C Arc in an. Browne.....169–76; disc. 507

Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating Extension of Magnetic. Dickinson, Frink.....220–3; disc. 510

Air, Long 60-Cycle Arcs in. Strom.....113–18; disc. 504

(Air Transportation) A Carbon-Pile Speed Governor. Button.....4–7

(Air Transportation) All-Electric Gun Charging. Rohn.....1–4

(Air Transportation) An Electronic Frequency Meter and Speed Regulator. Levin..779–86; disc. 1181

(Air Transportation) Investigation of Porcelain Insulators at High Altitudes. Fields, Cadwell...656–60

(Air Transportation) 150,000 Horsepower Applied to Aeronautical Research. White.....833–9

Air-borne Radar for Navigation and Obstacle Detection. Jensen, Arnett.....307–13; disc. 491

Aircraft, A. Unique Engine-Synchronism Indicator for. Pearson.....650–3

Aircraft, An Improved Azimuth Indicating System for. Lynch, Pfuntner.....806–12

Aircraft, Basic Design Principles for A-C Electric-Power Systems in Large Military. Chappuis, Olmsted.....12–17; disc. 487

Aircraft D-C Power Systems, Control and Protection of. Austin.....741–5; disc. 1170

Aircraft Electric Machines, Effect of Altitude on Ventilation and Rating of. Veinott...84–90; disc. 488

Aircraft Electric-Power System, Pressure-Arc-Interruption Circuit Breakers for 400-Cycle. Austin.....58–60; disc. 487

Aircraft-Engine Ignition Circuits, Electrical Measurements on. Berkey.....49–53

Aircraft Generators on Load Analysis, Effects of Thermal Characteristics of. Rogers.....819–24

Aircraft, Governor for Variable-Ratio Transmission Used in Developmental 400-Cycle Electric System for Large. Deach, Garr, Hutton.....194–8

Aircraft in Flight, Radio Telemetering for Testing. Fredrick.....861–70

Aircraft Models, Electronic Control of Frequency Converter Sets for Testing. Heumann, Strong..931–9

Aircraft Windshields, Electrical Anti-icing of McCrumm.....786–91

Aircraft Wire and Cable, Short-Time Current Ratings for. Jones, Scott.....644–8; disc. 1135

Alloy—An Improved Cable Sheathing, F-3 Lead. Hickernell, Snyder.....563–9; disc. 1136

Alternators, Motor-Driven Exciters for Turbine. Bodine, Crary, Rankin.....290–7; disc. 515

Altitude on Ventilation and Rating of Aircraft Electric Machines, Effect of. Veinott.....84–90; disc. 488

Altitudes, Investigation of Porcelain Insulators at High. Fields, Cadwell.....656–60

Ammeters and Voltmeters, Frequency Compensated A-C. Whittenton, Wilkinson.....761–4

Ampere Sealed Ignitron, A 400-. Steiner, Price.....680–5; disc. 1161

Analogy, Dimensionless Analysis of Servomechanisms by Electrical. Herwald, McCann 636–9; disc. 1132

Analogy Methods Applied to Servomechanism Problems, Electrical. McCann, Herwald, Kirschbaum.....91–6; disc. 515

Analysis by Automatic Oscillographs, Fault Location and Relay Performance. Dupuis, Jacobs.....442–6; disc. 1125

Analysis, Effects of Thermal Characteristics of Aircraft Generators on Load. Rogers.....819–24

Analysis of Measurements, Functional. Kinnard 987–95

Analysis of Servomechanisms by Electrical Analogy, Dimensionless. Herwald, McCann. 636–9; disc. 1132

Analyzer, A New Design for the A-C Network. Ryder, Boast.....674–80; disc. 1162

Anti-icing of Aircraft Windshields, Electrical. McCrumm.....786–91

Application and Performance of Electronic Exciters for Large A-C Generators. Langstaff, Vaughan, Lawrence.....246–53; disc. 515

Application of Compandors to Telephone Circuits. Carter, Dickieson, Mitchell.....1079–86

Application of Rototrol Regulators, Industrial. Harris.....118–23

Application of Series Capacitors to Flash Welders, The. Deffenbaugh.....686–7

Application of the Betatron to Practical Radiography. Girard, Adams.....241–6; disc. 489

Application of the Ohm and Mho Principles to Protective Relays. Warrington.....378–86; disc. 490

Application Ratings of Indoor Power Circuit Breakers. Vikoren.....768–73; disc. 1168

Applications of Thin Permalloy Tape in Wide-Band Telephone and Pulse Transformers. Ganz..177–83

Approach to Probability Problems in Electrical Engineering, A New. Adler, Miller..630–2; disc. 1118

Arc in an Air Blast, Dielectric Recovery by an A-C. Browne.....169–76; disc. 507

Arc-Interruption Circuit Breakers for 400-Cycle Aircraft Electric-Power System, Pressure. Austin.....58–60; disc. 487

Arc Starting Characteristics of D-C Welders With Reference to Electrode Freering, Investigation of. Tyrner.....97–9; disc. 511

Arc-Welding Transformers, Capacitor Stabilization of. Blankenbuehler, Lester.....54–5

Arcing Ground Tests on a Normally Ungrounded 13-Kv 3-Phase Bus. Allen, Waldorf...298–306; disc. 498

Arcs in Air, Long 60-Cycle. Strom...113–18; disc. 504

Aspects of Polyphase Motor Design—The Design and Properties of the Magnetic Circuit, Some. Lloyd, Stone.....812–18; disc. 1151

Aspects of Rectifier Installations, Inductive Coordination. (Committee Report)...417–36; disc. 1115

Asynchronous and Single-Phase Operation of Synchronous Machines. Rankin.....1092–1102

Attenuating Transmission Line, The Solution of Transmission-Line Problems in the Case of. Glinski. 46–9

Automatic Control of Large Synchronous Condensers. Brown.....609–16

Automatic Control Systems, The Frequency Response of. Harris.....539–46; disc. 1131

Automatic Oscillograph With a Memory, An. Zarem..150–4; disc. 514

Automatic Oscillographs, Fault Location and Relay Performance Analysis by. Dupuis, Jacobs.....442–6; disc. 1125

(Automatic Stations) Carrier Supervisory Control of Pumping Station Over Power Cable. Derr, Keller, Hedke.....699–705; disc. 1124

Auxiliaries, Protection of Powerhouse. (Committee Report).....746–51; disc. 1115

Auxiliary Controllers for Marine Service, Design of D-C. Schaelchlin.....623–9

Azimuth Indicating System for Aircraft, An Improved. Lynch, Pfuntner.....806–12
